Making Your Life Easier

Restaurant Manger™ TableService is fast, easy and flexible. Countless features designed specifically for the table service environment make communication and order management much more efficient. Beyond improved service and reduced labor costs at the point of sale, Restaurant Manager's powerful back office tracking and analysis allow you to make fast, informed management decisions.

No matter the type of service you provide, from fine and casual dining to bar service and take-out, Restaurant Manager can help decrease costs, improve efficiencies and increase revenue. Choose the traditional touch screen or give your servers wireless order taking and payment capabilities with the RM Handheld for the ultimate in improved service and efficiency.

Providing Solutions to Real Business Problems

Restaurant Manager focuses on critical business issues facing today's restaurant owner. With Restaurant Manager you get robust functionality, fully integrated optional modules and the expertise needed to solve real business issues and meet your unique goals.

Business Need/Goal	How TableService Helps
A POS system that fits the way you do business, not vice versa	Perhaps the most flexible and configurable solution available, Restaurant Manager is designed with features and functionality you can tailor to your needs.
New ways to improve service and efficiency	The RM Handheld provides wireless tableside ordering with a variety of order entry methods as well as tableside payment. Mobility solutions provide management tools to let you view reports and act on server requests from virtually anywhere.
Features that make running an establishment easier	Features like adding items from any POS, "hold and fire", system redundancy and check or item splitting are just a few of the capabilities designed for maximum efficiency improvement.

Improve Operations in Real-Time

Managing a restaurant has never been easier – because Restaurant Manager puts you in control. Whether you have weekly promotions or daily menu changes, Restaurant Manager gives you the tools needed to boost your bottom line. Our built-in Event Scheduler lets you program events that are automatically activated at a specified time. For example, you can schedule special messages to appear on screen, keeping your employees informed and in the know. Also, real-time alerts sent via email, cell phone text messages or your PDA can keep labor costs in check and allow you to pay special attention to big spenders.

Restaurant Manager's comprehensive reporting package allows you to keep track of real-time sales results and other important data. Restaurant Manager makes front-of-the-house operations a breeze without sacrificing security and control. With extensive reporting features like real-time sales statistics, product mix reports, stock and item counters and server sales totals you spend more time with your customers and still keep up with the latest profit margin and performance measures.

Restaurant Manager Tips

1. Combine built-in Promotion and Coupon capabilities with our optional Loyalty Club to improve customer satisfaction and provide a truly robust program sure to bring back existing customers and deliver new customers to your table service establishment.
2. Using real-time Alert capabilities you maximize the management impact of Restaurant Manager functionality. One way to use Alerts is to monitor employee hours worked and receive an alert when overtime is approached.
